

M500

NINGI SERVICES

We set the standards

Protection offered:

Protection offered when in STANDBY

- Phase loss and phase rotation protection
- Earth fault protection
- Under and over voltage protection
- Overload protection
- Over current protection

Protection offered when in START UP

- 1st protection
- Start up x 1 protection
- Short circuit x 1 protection

Protection offered when in RUN

- Voltage unbalance protection
- Under current protection
- Current unbalance protection
- All protection in standby and prestart

Features:

- One unit for any size motor / transformer
- Star / Delta starting selectable
- Under / Over / Unbalanced Voltage protection
- Phase loss, phase rotation detection
- Under / Over / Unbalance Current protection
- Earth fault protection
- Pre start warning
- Start up protection
- Auto start, auto stop, auto restart functions
- Infrared remote start, stop
- Infrared remote parameter adjustments
- Real time clock
- Data logging with date and time stamp on all events
- RS485 / RS232 communication
- Three 10A 240Vac single pole normally open contacts
- Two 10A 240Vac single pole change over contacts
- Any combination of functions could be used
- Over voltage / under voltage / phase loss / phase rotation / earth fault and overload protection is offered even when in standby
